

## Cosmos and Creation

**These optional questions are designed to help you relate this Scriptural Reasoning session to issues in the modern world, particularly those relating to science and technology.**

Discussion starters:

- What do these texts tell us about the physical universe? Do they have anything to do with science?
- How do you bring together modern scientific knowledge, for example on the age of the earth or the process of evolution, with the idea of God as Creator?
- Will science ever explain away the need for the existence of God?
