

Cosmos and Creation

These optional questions are designed to help you relate this Scriptural Reasoning session to issues in the modern world, particularly those relating to science and technology.

Discussion starters:

- What do these texts tell us about the physical universe? Do they have anything to do with science?
- How do you bring together modern scientific knowledge, for example on the age of the earth or the process of evolution, with the idea of God as Creator?
- Will science ever explain away the need for the existence of God?
